

- **Body** (default): If you use this default Input, and a text template as the source of it, that text template **must** be plain text or else it will render the rich text's markup directly in the body. To change this, select *Plain Text* from the drop down in the upper right.
- **Rich-Text-Formatted Body** (optional): alternatively, you can use a Text Template with Rich Text enabled and use this optional input to provide a formatted email body.
