Notable SFDX Plugins and Resources

- shane-sfdx-plugins
  - Lots of commands from Shane McLaughlin, notable ones are a Skinny Profile converter, some neat GitHub automation, lwc css merging, and sobject creation
- awesome-sfdx-plugins
  - Shane's "awesome" repo for listing out community plugins.
  - Does what it says on the tin.
- sfdx-git-packager
  - I like doing deployments off of diffs, not the whole repo. Keeps the audit log clean, this helps ^.
- SFDX-Data-Move-Utility
  - Lets ya move data around orgs fairly easy, handles weird lookup scenarios well.
- sfpowerscripts
  - Lots of goodies in this one, full profile retrieves and reconcile. Was refactored from sfpowerkit.
- American Express' sfdx-cli-plugin
  - Some good stuff on anon apex, shell execution
- texei-sfdx-plugin
  - There's a profile cleaner in here, stripping out anything that's already on a pset.
  - Also an org shape command I've seen people reference, I can't personally speak to it.
- sfdx-toolbox-package-utils
- sfdx-cmdt-plugin
  - CSV->XML for CMDT mappings.
- sfdx-flowdoc-plugin
  - Generate a PDF doc off of some flow types.

But Crit, I wanna build my own!

- https://github.com/forcedotcom/salesforcedx-templates Here's some templates
- Good walk through on plugin creation here https://www.youtube.com/watch?v=kPks_9W5gvA&t

Think about what you need to automate!
